Company Overview

A single point of accountability for cargo movement

VMG International Cargo LLC is a Dubai-based logistics company that coordinates freight forwarding, customs support, road transport, cargo handling and delivery planning for commercial customers. We help importers, exporters, contractors, technology suppliers and regional distributors manage shipments through one accountable team.

Our operating model

We work through approved airlines, shipping lines, consolidators, trucking partners and handling providers. VMG manages the customer relationship, quotation, documentation, coordination and shipment visibility from booking to final delivery.

- **One responsible team**
  One contact for freight, customs coordination and delivery.
- **Flexible capacity**
  Multimodal solutions without a fixed fleet dependency.
- **Clear information**
  Practical updates and documented shipment milestones.

Integrated Logistics Services

Freight, customs and cargo movement coordinated as one service

Air Freight

Airport-to-airport and door-to-door solutions for urgent, high-value and time-sensitive cargo.

Sea Freight

FCL, LCL, breakbulk and containerised movements for imports, exports and project requirements.

Road Freight

UAE collection, delivery, container haulage and GCC road movements through approved partners.

Customs Support

Document readiness, clearance coordination and release follow-up subject to approvals.

Cargo Handling

Packing, palletising, crating, loading and unloading coordination through approved facilities.

Project Logistics

Shipment planning and staged delivery coordination for contractors and specialist projects.

Air Freight

Fast, controlled and commercially focused cargo movement

VMG coordinates air-freight solutions for shipments that require speed, controlled handling or close delivery coordination. We assess cargo dimensions, weight, commodity, packing, routing and transit requirements before selecting the most suitable carrier or consolidation option.

Our support can include collection planning, booking coordination, document readiness, terminal handover, flight tracking, import-release follow-up and final delivery coordination.

Sea Freight and Project Cargo

Flexible solutions for volume shipments, containers and specialist movements

Sea freight gives customers a cost-conscious option for routine commercial imports, exports, containerised cargo and larger project movements. VMG reviews the cargo profile and delivery requirement to recommend the appropriate FCL, LCL, breakbulk or project-cargo approach.

Full Container Load

Container booking, documentation coordination, port process support and delivery planning.

Less than Container Load

Consolidated sea freight for smaller shipment volumes.

Breakbulk and Heavy Cargo

Planning support for oversized, non-containerised or specialist goods.

Project Cargo

Milestone-based coordination for contractors, engineering teams and site delivery schedules.

Road Freight and Customs Support

Local delivery and border processes managed with clear coordination

A shipment is only complete when cargo reaches the receiving location in the right condition and within the agreed delivery window. VMG coordinates UAE collections, commercial deliveries, container haulage and selected GCC road movements through approved transport partners.

- **Road freight planning**
  Vehicle selection, collection timing, route planning and delivery appointment coordination.

- **Customs coordination**
  Document review, customs-declaration follow-up and release coordination, subject to authority requirements.

- **Delivery control**
  Final delivery status, receiving confirmation and escalation support for operational issues.

Customer responsibility

Customers remain responsible for accurate commercial documentation, commodity details, permits, approvals, duty and tax obligations, and any information required by authorities or carriers.

Cargo Handling and Packaging

Preparation and handling support for safe cargo movement

Proper preparation protects cargo, supports efficient handling and helps avoid documentation or acceptance issues at terminals, ports and receiving locations. VMG coordinates cargo packaging and handling through approved facilities and partners based on the nature of the shipment.

Packing and Repacking

Coordination of export-ready packing and commercial presentation.

Palletising and Crating

Arrangement of cargo protection and handling preparation as required.

Container Stuffing

Loading and unloading coordination through approved facilities.

Cargo Handover

Collection planning, weighment, documentation and terminal handover support.

Trade Lanes

Core routes for business between the UAE, India, GCC and China

VMG is building focused capability around trade lanes that matter to UAE-based businesses. Each route is supported by a practical mix of air, sea and road freight options, coordinated through approved carrier and handling partners.

UAE and India

Air and sea freight for commercial imports, exports, urgent cargo and consolidation.

UAE and GCC

Road-freight and regional distribution support for cross-border commercial movements.

China and UAE

Sea and air import coordination for trading, technology and commercial cargo.

Global Connections

International routing through approved airline, shipping-line and logistics networks.

Industries We Support

Logistics solutions shaped around commercial and project requirements

Trading and Distribution

Routine imports, exports, consolidation and delivery coordination.

Technology and Data Centres

Time-sensitive equipment, spares and controlled delivery planning.

Engineering and Contracting

Project cargo, materials sequencing and planned site deliveries.

Retail and Consumer Goods

Commercial freight, customs coordination and local distribution.

Industrial and Manufacturing

Parts, equipment, containers and supply-chain support.

Small and Mid-Sized Businesses

A practical, single-window logistics contact for day-to-day cargo needs.

Our Delivery Process

A clear operating path from shipment enquiry to final handover

1

Understand

We review cargo, route, timing, handling needs and commercial priorities.

2

Plan

We recommend a suitable air, sea, road or multimodal solution.

3

Coordinate

We manage booking, documentation, partner coordination and operating milestones.

4

Monitor

We provide agreed status updates and address issues as they arise.

5

Deliver

We coordinate release, final delivery and shipment close-out information.

One accountable team. Clear shipment coordination. Practical delivery support.
